

**In the Specification:**

Please replace the originally filed paragraph [0023] with the following:

[0023]        A reinforcing ~~protrusion 15~~ protrusion 115 is formed on the vertical supporting portion 112. As shown in the drawing, the reinforcing ~~protrusion 15~~ protrusion 115 is formed along a vertical direction of the vertical supporting portion 112. Coupling holes 116 and 118 are formed on each side of the reinforcing protrusion 115 for bolt coupling. The horizontal supporting portion 113 is extended in an inclined direction from the connecting portion 111 and is then extended horizontally. The horizontal supporting portion 113 has a rectangular plate shape. A coupling hole 117 is formed in the horizontal supporting portion 113 for bolt coupling.
